DADO Bathroomware Technical Drawings available in 3D Warehouse

by Dado Australia

[+ Email](#) [+ Contact Details](#) [+ www.dadoaustralia.com.au](#)

Dado Australia offers technical drawings for their entire range of bathroomware products in 3D Warehouse.

Dado is a manufacturer of a stylish range of baths and basins in DADOquartz.

The Sketch-up files of Dado's bathroomware technical drawings are compatible with most of the drawing programs for architects and designers. These drawings have been developed to make 3D renders with realistic-looking baths.

Technical drawings of Dado's bathroomware are also available in .dwg, .dxf, .pln, .gsm and .rfa formats. Drawings in these formats are available from Dado.

DADOquartz used in the manufacture of Dado's baths and basins is an **engineered stone** with a matrix of resin and quartz.

Tight quality control is exercised on the entire process of material selection, treatment and finishing.

Performance features of DADOquartz include mildew and mould resistance, heat retention, colour stability, zero water absorbency, UV resistance as well as high thermal shock resistance.

DADOquartz bathroomware comes with a standard 25-year warranty.
